Health Careers Academy Seniors Visit Loma Linda University Medical Center

On November 03, 2017, the Canyon Springs High School Health Careers Academy senior class, visited Loma Linda University Medical Center. Upon arrival, the students were given an overview of what LLUMC has to offer. The students were then directed to the cadaver labs. There they were taught about the anatomy of the thoracic cavity and muscle structure. HCA students also experienced simulations of a patient in labor, a patient who was under the

influence, and the setting in which
paramedics operate.
